- History
- Fantasy & Science Fiction Literature

PROFILE

Computer science student specialising in video games, passionate about gameplay mechanics design and game systems development, I thrive building interactive audiovisual experiences. I am looking for a work-study contract to strengthen my technical skills and gain professional experience in the software development industry.

SKILLS

○ PROGRAMMING LANGUAGES & SOFTWARE

Python, C/C++, C#, Unity, Unreal Engine 5

○ CODE EDITORS & TOOLS

Visual Studio, Rider, GIT, ClickUp

EDUCATION

○ BACHELOR'S DEGREE IN COMPUTER SCIENCE / GAME DEVELOPMENT

September 2024 – Présent

- Development of 2D arcade games (breakout and shoot'em up) learning C/C++ fundamentals and templates.
- Development of a real-time multiplayer game and a UDP network infrastructure.
- Development of a 3D rendering engine using DirectX 12.
- Unity development across multiple projects: implementation of the 3Cs with Cinemachine cameras and Unity's Input System, procedural generation, UX design, MVC architecture for UI, Shader Graph & VFX Graph.
- Unreal Engine development: gameplay mechanics in C++/Blueprint (time-delayed clone mechanic) and realistic physics simulation.
- Technical Lead & Producer on an interdisciplinary vertical slice (UE5, ~15 people, 2 months): coordination of the dev team (6 people) and takeover of production management mid-sprint.

○ PREPARATORY CLASSES FOR GRANDES ÉCOLES

2019 – 2022

- **BCPST (Biology, Chemistry, Physics, Earth Sciences):**
- Python programming for a shape recognition system identifying Galápagos iguanas from drone imagery.
